

Revenue by Gender char and Insights

Insights of above pie chart

Revenue by Gender

- Male → 150.21M (≈59.9%)
- Female → 101.3M (≈40.1%)

Main Insight:
Female customers contribute the majority of total revenue, accounting for approximately 60% of total sales, while Male customers contribute around 40%.

This suggests:

- Female segment is currently the dominant revenue driver.
- There may be higher purchase frequency or higher average spending among female customers.
- Marketing campaigns may be more effective toward female customers.

Insight Of Age Group by column chart:-

Insights of Age Group:-

Form above insights:

- Middle Age → 72M
- Adults → 73M
- Senior Citizen → 48M
- Young Adults → 44M
- Teen Age → 14M

Main Insight :-

The Middle-Aged and Adult segments generate the highest revenue, contributing the majority share of total sales. Teen customers contribute the lowest revenue.

suggestion to company:-

The company should focus marketing efforts on retaining Middle-Aged and Adult customers while designing targeted promotional campaigns to increase engagement among younger segments.

Business insights:-

1. Adults(Highest Revenue) :-

- Likely stable income group
- Higher purchasing power
- Family-oriented spending

This is your **core revenue-driving segment**

2. Middle Age Adults (Very Close Second):-

Active working professionals

- High consumption behavior

Strong secondary revenue segment.

3.Senior & Young Adults (Moderate Revenue):-

- Consistent but not dominant
- Possibly selective buying behavior

5. Teen Age (Lowest Revenue):-

- Limited income
- Lower spending capacity

yearly Insights using Clustered bar chart

Yearly Insights :-

Revenue by Year is very important it shows growth performance :-

From dashboard (approx values I observed) :-

- 2021 → ~115M
- 2022 → ~115M
- 2023 → ~22M

Main Insight :-

Revenue shows a slight declining trend from 2021 to 2023, with 2021 to 2022 being the highest-performing year and 2023 showing comparatively lower revenue.

suggestions:-

This declining trend suggests the need for customer retention strategies and improved marketing efforts to stabilize revenue growth in upcoming years.

Business Interpretation:-

1. 2021 to 2022 – Peak Year :-

- Highest revenue recorded
- Strong customer activity
- Possibly high demand period

Business Interpretation:-

1. 2023 – Noticeable Decline:-

- Lowest among three years
- Indicates slowdown in sales

Insights of category's using Line Chart:-

Business Interpretation:-

1. Clothing (Highest Revenue Driver)

- Core business category
- High demand
- Possibly frequent purchases

This is **primary revenue engine**.

Business Interpretation:- 2

2. Shoes & Technology (Strong Secondary Contributors) :-

- Consistent demand
 - Good revenue but lower than clothing
 - Likely mid-to-high value products
- Important supporting categories.

Insights of category's :-

Category insight is very important — this shows product performance:-

From dashboard (approx values):

- Clothing → 114M
- Shoes → 67M
- Technology → 58M
- Cosmetics → 7M
- Toys → 4M
- Others (Books, Food & Beverage, Souvenir) → Very low / 0

Main Insight:-

Clothing is the top-performing category, contributing the highest share of total revenue, followed by Shoes and Technology. Categories like Cosmetics and Toys generate significantly lower revenue.

suggestions:-

The company should continue investing in high-performing categories like Clothing while exploring marketing and cross-selling strategies to boost underperforming segments such as Cosmetics and Toys.

Business Interpretation:-3

3. Cosmetics & Toys (Low Contribution) :-

- Niche audience
- Lower purchase frequency
- Possibly low marketing focus

Growth opportunity area.

KPI'S Insights:-

Invoice_count

99.457K

count_invoice

Transaction count insights :-

Business Interpretation:-

High transaction count means:-

1. Customers are actively purchasing
2. Strong order frequency
3. Good repeat behavior
4. Stable operational flow

Insights:-

The company has served 99 .475k unique customers, reflecting a broad customer base and strong market reach.

Main Insight :-

The business recorded approximately 99.4K transactions, indicating high customer engagement and consistent order activity.

Transaction count insights :-

Total revenue

251.51M

Total_revenue

Insights of total revenue:-

Business Interpretation:-

Such high revenue suggests:-

1. Strong market presence
2. Effective product demand
3. Stable customer base
4. Good transaction frequency
5. Strong pricing strategy

Insights:-

The business has generated a total revenue of 12.64 million over the analyzed period, indicating strong overall sales performance.

Main Insight:-

The company has achieved a total revenue of 251.51M, reflecting strong overall sales performance and effective customer monetization strategies.

Insights of total revenue:-

KPI'S Insights:-

AOV
2.53K

Insights of Average Order Value (AOV):-

Insights :-

The Average Order Value is approximately 2.35k, indicating that customers spend a moderate amount per transaction.

That means:-

On average, each order generates ₹2,350 in revenue.

That is NOT small. That's a healthy spending level.

Insights of Average Order Value (AOV):-

Business Interpretation :-

A 2.35K AOV suggests:-

Customers are buying multiple items per order
OR

Customers are purchasing mid-to-premium products

This supports a **value-driven business model**, not low-cost bulk sales

Total_quantity's
299K

Insights of Total Quantity :-

Insights:-

299K total quantity is a strong number.

That means:-

The business sold approximately 299,000 units during the analyzed period.

That is high product movement

Insights of Total Quantity :-

Business Interpretation :-

A high quantity means :-

1. Strong demand across categories
2. Frequent customer purchases
3. Healthy inventory turnover
4. Active customer engagement

This supports your revenue performance.

Insights of Slicers:-

Insights:-

To make the dashboard interactive, I have implemented slicers for Gender, Shopping Mall, and Payment Method. These slicers allow dynamic filtering of revenue and customer insights, enabling better segment-level analysis and decision-making. Slicers enhance user experience and allow decision-makers to quickly analyze revenue patterns across different customer segments without modifying the core dataset.

To say strongly:-

Slicers help in interactive analysis by allowing stakeholders to filter data based on specific segments, which supports more targeted business insights.
